

A Sustainability Workshop

Water Resources Solutions for New Jersey's Sustainable Communities

Sponsored by NJWRRI, Rutgers Cooperative Extension, and New Jersey Sea Grant

The New Jersey Water Resources Research Institute has funded water-related research projects throughout New Jersey. This Workshop will bring this research to the communities of the State to help them in their endeavors to become sustainable. The Workshop also will provide attendees an opportunity to partner with Rutgers Cooperative Extension and NJ Sea Grant on implementing these sustainable solutions in their community.

A sustainable community is a community that meets the needs of the present without compromising the ability of future generations to meet their own needs. The goal of this workshop is to provide opportunities and resources for Green Teams, Environmental Commissions, and Township Committees to engage residents in taking ACTION to make their communities sustainable.

This Workshop will be offered at three locations. Although there is no charge to attend, we do ask you to register at www.water.rutgers.edu. This will allow us to have ample refreshments and handouts for each session.

SOUTHERN NEW JERSEY LOCATION

DATE: Tuesday, November 30, 2010
TIME: 6-7 Cocktail Reception and Mixer
7-8 Workshop
PLACE: Rutgers EcoComplex, Bordentown, New Jersey
